

Many Children in Alaska Today

I don't have health insurance. My tummy hurts but I can't afford to go see the doctor.

My mom feels all alone. She yells at me when she's stressed.

My parents both work so I go to the neighbor's and watch TV all day.

No one reads to me at home. I just started kindergarten. I'm already behind.

I dropped out of school because I could never catch up. Now I'm pregnant and my boyfriend is in jail.

All Alaska Children Tomorrow: It's Your Choice

Health Care + Family Support + Access to Quality Child Care = Ready Kindergarteners = Higher Graduation Rates, Lower Crime Rates

My family signed me up for Denali Kid Care. I go to see a doctor when I don't feel good.

My family takes me to Parents as Teachers toddler groups where we play fun learning games together.

I have great teachers at my child care and Head Start. They like their jobs and know a lot about helping kids learn.

You should see all of my books at home! I am excited about learning and can't wait for kindergarten!

I'm graduating with honors because I had a good start in life.
